

Fused Terminal Blocks

SERIES WIV-200/600

The WIV 204-N/600 may be used when it is desired to have a direct connection from a 480 VAC or 600 VAC source, either Wye or Delta to an instrument.

Connection is made directly from the Voltage source to be monitored, through the fused switches into the instrument.

A fused switch and neutral block (non fused, non switched) are also provided for the 120 V power source for the instrument.

The unit is mounted on a 150 mm DIN rail. 2A fuses are supplied.

| <u>CATALOGUE #</u> | <u>CONNECTION METHOD</u> | <u>RATING</u> |
|---------------------------|---------------------------------|----------------------|
| WIV 204-N/600 | 3 PT, Neutral, 120V power | 30A 600V |
